## PROBLEM DEFINITION

The Web site is to be created based on the following requirements:

1. The Home Page should be created with proper sections, graphics and logo.
2. A Menu should be created which would categorize all the information about the features provided in the Site.
3. The information should be categorized according to the Brand names of Mobiles like if a User wants to see only Nokia Phones then he clicks on Some Nokia Link/button etc and he will see only That Brand phones and so on.
4. A Brief summary of features of Individual phones should be displayed on the Web Page along with the Cell phone but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
5. A Comparison Web Page should also be there where there is Phone comparisons done with various models of same brand or various models of various brands.
  - The Comparison information should be provided in Tabular format comparing the features of different phones.
  - This information would be for 5 Phones of similar brands and 2 phones of different brands for 1 month and then it will change so for the time being the Page should handle the above requirement.
6. The Colour Schemes should be soothing, more of Pastel Colours can be chosen for the same.
7. When a particular brand phones are being displayed the background image of the Web page should show the Logo of that brand for e.g. if Nokia Phones are being displayed then that page should have the Logo of NOKIA as the background image and the same in case of other Brands.
8. There should be a “Contact Us” page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email.

Address of the Company: A-65, ACME Co., Street no 12, New York  
Phone Numbers: +001-28272300, 2466, 2469  
Email Address: [webmaster@cellinfo.com](mailto:webmaster@cellinfo.com)
9. The information on the mobile phones and all can be picked up from the Sites of Nokia, Samsung etc.
10. To avoid creation of html pages you can make use of layers, flash buttons and other components of **Dreamweaver** for creation of pages.
11. The appearance and organization of the site will carry more chances of your selection for getting the contract so both the factors are important to be considered.

---

# CUSTOMER'S REQUIREMENTS SPECIFICATIONS (CRS)

**Client:** *AKSME\_MOBILE*

**Business/Project Objective:**

ASKME Ltd. Is a Multi National Company providing Information services to General People they have been providing information to people through Telephone calls which could include anything from Pin to Piano. Their major source of income comes from informing the customers about those products first for which ASKME is getting paid for.

We are supposed to create a website for yours with the below mentioned requirement specifications.
